Supreme Court expresses concern over repeated lapses in conduct of NEET examination

New Delhi: The Supreme Court today expressed concern over repeated lapses in the conduct of the NEET examination saying that it was sad that the National Testing Agency had not learnt any lesson from the earlier paper leak controversy. A bench of Justices PS Narasimha and Alok Aradhe sought responses from the Centre, the National Testing Agency (NTA) and the CBI on petitions demanding replacement of the testing agency with a more robust and autonomous body to conduct the medical entrance examination. The court directed the NTA to file an affidavit by Thursday detailing compliance with recommendations made last year by a committee headed by former ISRO chief K Radhakrishnan for overhauling the agency's functioning. The petitions alleged recurring paper leaks had affected the rights of over 22 lakh students. The plea also sought the formation of a high-powered monitoring committee headed by a retired Supreme Court Justice to oversee future examinations. The NEET-UG exam conducted on 3rd of this month was cancelled following allegations of a paper leak.

Delhi court sends physics lecturer Manisha Sanjay Havaldar to six-day CBI custody in NEET-UG paper leak case

New Delhi: A Delhi court has sent Pune-based physics lecturer Manisha Sanjay Havaldar to six days of Central Bureau of Investigation custody in the NEET-UG paper leak case. Special Judge Ajay Gupta allowed the CBI's plea seeking custodial interrogation of the accused. Havaldar was arrested on 22nd May and was produced before the court on transit

remand. According to the CBI, Havaldar, who worked as a translator for NEET-UG examination material and is associated with Seth Hiralal Saraf Prashala in Pune, allegedly circulated physics questions meant for translation along with other accused. The agency has described her as a key link in the alleged leak of NEET-UG physics question papers.

PIB debunks fake claim linking Rajnath Singh to support for BLA

New Delhi: The Press Information Bureau's (PIB) Fact Check unit on Monday dismissed as "fake and fabricated" a social media claim alleging that Defence Minister Rajnath Singh had expressed support for the Balochistan Liberation Army (BLA). In a post on X, the PIB Fact Check unit said a Pakistani propaganda account was circulating a false claim that the Defence Minister had spoken about India's support to the BLA.

"The claim is fake and fabricated. The Defence Minister has not made any such statement. Beware of accounts propagating false narratives about the Government of India," the PIB Fact Check unit said. According to the viral post, Rajnath Singh was falsely quoted as saying that India "fully supports the BLA and will continue providing financial aid and weapons" to the outfit. The fabricated content also carried a YouTube video link from an event in Shirdi, Maharashtra, where the Defence Minister had inaugurated a private-sector defence manufacturing complex on Saturday.

The PIB Fact Check unit also urged people to

report suspicious content related to the central government through its official WhatsApp helpline and email channels. Earlier on May 24, the government had flagged another fake online investment scheme circulating in the name of Union Finance Minister Nirmala Sitharaman. PIB clarified that the so-called 'Quantum AI' investment platform, which promised monthly returns of Rs 3 lakh on an investment of Rs 22,000, was fraudulent and had no connection with the government.

SC notice to Centre on plea seeking ban on child employment in orchestras, spas

New Delhi: The Supreme Court on Monday, May 25, sought responses from the Centre, child rights body NCPCR, and the NHRC on a PIL seeking an absolute ban on the employment of children and adolescents in orchestras, dance troupes, massage parlours, and spas. A bench comprising Chief Justice Surya Kant and Justices Joymalya Bagchi and Vipul M Pancholi took note of the submissions of senior advocate H S Phoolka, appearing for child rights

collective 'Just Rights for Children Alliance' (JRCA), and issued the notices to Union ministries of labour and law and justice. Phoolka argued that minor girls aged 10 and 11 years were being employed in orchestras and dance bars. "For spas and massage parlours, some states have made rules of 18 years as the minimum age," he said. Terming the situation "serious", the bench also issued notices to the National Commission for Protection of Child Rights

(NCPCR) and the National Human Rights Commission (NHRC) on the PIL. "Issue a writ of mandamus or appropriate directions directing the Central Government... to exercise its powers under Section 4 of the Child and Adolescent Labour (Prohibition and Regulation) Act, 1986, to include the employment or performance of children below 18 years in orchestras, dance bars, dance troupes, nautanki performances, massage

parlours, spas, and salons, or any similar establishments that depict children in obscene or

exploitative manner in Part A of the Schedule to CALPRA, thereby categorically prohibiting such employment," the plea said. The petition alleged that these sectors had evolved into "clandestine fronts" for organised trafficking, sexual exploitation, and forced labour of minor girls across the country. The petition, filed by the JRCA through Advocate Sonali Jain, highlighted a critical

"enforcement vacuum" in the Child and Adolescent Labour (Prohibition and Regulation) Act (CALPRA), 1986. Under the law, "hazardous" occupations where adolescent labour is strictly prohibited are listed under Part A of the CALPRA Schedule. However, massage parlours and spas currently fall under Part B, meaning the employment of adolescents (aged 14-18) is merely "regulated" rather than banned.

Petrol, diesel prices raised by Rs 2.61 to Rs 2.71

New Delhi: Petrol prices were raised by Rs 2.61 a litre and diesel by Rs 2.71 on Monday, May 25, the fourth increase in less than two weeks that extended a delayed pass-through of soaring global crude oil costs triggered by the Iran conflict. The latest increase took cumulative hikes since May 15 to nearly Rs 7.5 per litre. In Delhi, petrol prices rose to Rs 102.12 per litre from Rs 99.51, while diesel climbed to Rs 95.20 from Rs 92.49, according to industry sources.

Fuel prices have now reached their highest levels since May 2022 after remaining largely frozen for more than two years, barring a Rs 2-per-litre cut in March 2024 ahead of national elections. The hike came as global oil prices fell sharply amid tentative hopes for a deal to

end the US-Israel war on Iran. Brent crude, the primary benchmark for global oil prices, fell more than 5 per cent after the US and Iran agreed in principle to reopen the Strait of Hormuz. Global crude oil prices had surged more than 50 per cent since late February following US-Israeli strikes on Iran and disruptions to shipping through the Strait of Hormuz, a key global oil

(BJP) expanded its electoral footprint by winning three of five state and UT elections, including West Bengal. Since the start of war, domestic cooking gas LPG prices have been raised by Rs 60 per 14.2-kg cylinder and that of compressed natural gas (CNG) by Rs 4 per kg since mid-May. Despite the price increases, auto fuels petrol and diesel, and domestic cooking gas LPG continue to be sold at a substantial loss. Besides the three fuel, state-owned fuel retailers — Indian Oil Corporation (IOC), Bharat Petroleum Corporation Ltd (BPCL), and Hindustan Petroleum Corporation Ltd (HPCL) — have paused increase in jet fuel (ATF) rates. The three firms together control 90 per cent of India's fuel market.

Centre moves to overhaul CBSE payment gateway system amid re-evaluation portal issues

New Delhi: Union Education Minister Dharmendra Pradhan on Sunday held discussions with Union Finance Minister Nirmala Sitharaman over the technical and payment-related difficulties faced by students during the Central Board of Secondary Education (CBSE) post-result and re-evaluation process. Following the meeting, it was decided that four major public sector banks — State Bank of India, Bank of Baroda, Canara Bank and Indian Bank — will assist CBSE in strengthening its

payment gateway infrastructure and integrating it more effectively with the board's post-examination services portal. According to the Education Ministry, the banks will help establish robust payment protocols to ensure smoother transactions, timely processing of payments, quick resolution of payment failures, and automatic refunds in cases of excess payments. Pradhan also directed CBSE to undertake a complete overhaul of its

payment gateway system in order to improve reliability and reduce technical disruptions faced by students and parents. The coordinated effort between the Ministry of Education, Ministry of Finance, and the participating public sector banks is aimed at ensuring seamless digital transactions, enhanced payment gateway stability, and a smoother user experience for students applying for re-evaluation and other post-result services.

Delhi CM Rekha Gupta leads 'Metro Monday' drive

New Delhi: Delhi Chief Minister Rekha Gupta spearheaded the government's inaugural 'Metro Monday' campaign today. The Chief Minister opted for the Delhi Metro and public feeder buses to reach the Delhi Secretariat, setting a personal example for commuters across the capital. Aligned with Prime Minister Narendra Modi's nationwide call for energy security and environmental preservation, the initiative marks a concerted effort by the Delhi administration to reduce reliance on private and official vehicles. Joining the Chief Minister in this drive, cabinet ministers and senior officials also traded their official fleets for public transit, signalling a significant push toward greener, more efficient urban mobility. Earlier on May 18, setting an example to combat urban pollution and traffic congestion, Delhi Chief Minister Rekha Gupta on

Monday dumped her official vehicle to commute via the Delhi Metro and a feeder bus to reach her office at the Delhi Secretariat. The commute began in the morning when CM Gupta walked from her official residence, Mukhyamantri Jan Seva Sadan in Civil Lines, to Lok Niwas for a meeting with Lieutenant Governor Taranjit Singh Sandhu. Following the meeting, she walked to the Kashmere Gate Metro Station, boarded a train to the ITO Metro Station, and then took a public feeder bus to reach her office at the Delhi Secretariat. Senior leaders Parvesh Verma and Ravindra Indraj accompanied the Chief Minister throughout the public transit journey. The commute was part of the Delhi government's newly launched 'Metro Monday' initiative, organised under the broader national framework of

'Mera Bharat, Mera Yodgan'. Responding to the Chief Minister's call, ministers and officials of the Delhi Government used Metro and public transport today to reach their respective offices. Speaking to reporters, Delhi CM Rekha Gupta said, "I appeal to all citizens to make maximum use of public transportation. This will not only conserve the nation's fuel resources, but it is also absolutely essential for our city, Delhi. Given the rising levels of pollution and the traffic congestion issues in Delhi, if all of us, even if only on a small scale, begin incorporating the Metro, public transport, and buses into our daily routines, it will prove immensely beneficial for us all... We are working extensively to enhance 'last-mile connectivity'; if every individual contributes even a little to this endeavour, it will yield truly remarkable results

for the city of Delhi. Travelling by the transit network alongside her ministers, MLAs, and top officials to set an example, Gupta expressed gratitude to the large numbers of residents who participated in the mass campaign to help build a cleaner and more efficient Delhi. "This approach will provide a solution to every challenge facing our city, be it the issue of pollution or any other problem. Today, on the occasion of the 'Metro Monday' initiative, for which we had issued a city-wide appeal across Delhi, I, along with all my colleagues, ministers, MLAs, and officials, have made a collective effort to travel by Metro today. I am delighted to observe that a great many residents of Delhi have also resolved to travel by Metro today. I express my heartfelt gratitude to one and all. Together, we will make Delhi even better", the CM added.

Don't take it so sentimentally: CJI on Cockroach Janta Party plea

New Delhi: The Supreme Court on Monday, May 25, declined to urgently list two petitions linked to the Cockroach Janta Party (CJP) — a satirical social media movement that briefly went viral before its handles were suspended — telling one of the petitioners not to take the matter too emotionally. Advocate NK Goswami mentioned the first petition before a bench of Chief Justice of India (CJI) Surya Kant and Justice Joymalya Bagchi, submitting that despite the CJI's clarification, a "distorted and malicious narrative" was being kept alive. The CJI was having none of it. "Don't take it so sentimentally," he told the lawyer.

Second petition seeks CBI probe. A second petition, also filed in the backdrop of the CJP controversy, was mentioned separately by another advocate seeking urgent listing. This plea sought a Central Bureau of Investigation (CBI) investigation into the use of fake law degrees and asked the court to prohibit the monetisation of oral observations made during

court proceedings, arguing that judicial remarks were being deployed for publicity campaigns. The CJI said there was no grave urgency and that the matter would be listed in due course. How it started. The CJP controversy traces back to May 15, when the CJI made remarks during a hearing on senior designation for a lawyer, equating those who attack institutions under the guise of online activism with "cockroaches" and "parasites." The comments were widely reported as a broadside against unemployed youth, triggering a social media backlash and the birth of the satirical CJP, which amassed millions of followers within days before its handles were taken down. On May 16, the CJI issued a strongly worded clarification saying he was "pained" by the coverage, stressing that his remarks were directed specifically at those entering the legal profession through "fake and bogus degrees" and had been "misquoted by a section of the media."

Marco Rubio calls Taj Mahal a 'true treasure of the world' during visit with wife Jeanette

New Delhi: US Secretary of State Marco Rubio on Monday visited the iconic Taj Mahal along with his wife, Jeanette Rubio, describing the monument as "one of the true treasures of the world." The couple spent nearly one-and-a-half hours at the UNESCO World Heritage site in Agra and later penned a message in the visitors' book, writing, "Thank you for allowing us to visit one of the true treasures of the World." US Ambassador to India Sergio Gorb also accompanied the Rubios during the visit.

The Taj Mahal, one of the Seven Wonders of the World, has long remained a major attraction for global leaders and dignitaries visiting India. Last year, US Vice President JD Vance visited the monument with his wife Usha Vance and their children — Vivek, Mirabel, and Ewan. US President Donald Trump had also toured the Taj Mahal during his first presidential term alongside former First Lady Melania Trump. During that visit, Trump described the monument as "a timeless

testament to the rich and diverse beauty of Indian culture." According to the official Taj Mahal website, the monument is regarded as the finest example of Mughal architecture, blending Persian, Indian, and Islamic architectural styles. UNESCO declared it a World Heritage Site in 1983, calling it "the jewel of Muslim art in India and one of the universally admired masterpieces of the world's heritage."

Spiritual & Social activist Narendra Kumar Nanda Passed Away

Paradip/Kujang, (DMC) 25/05 : Narendra Kumar Nanda (popularly known as Naru Bhai), a well-known devotee of Sri Sri Thakur Nigamananda Saraswati Maharaj and former secretary of the Kujang Saraswat Sangha, passed away due to a heart attack on Monday at his residence in Samagola. He was 70 years old at the time of his demise. He had served as the secretary of Kujang Saraswat Sangha as well as the Jagatsinghpur District Saraswat Sangha. He worked as a Sanskrit teacher at Basudev Vidyapith, Chakradharpur in the Paradip region and retired in 2014.

After retirement, he played a significant role in the construction of the ashram and various developmental activities of the Kujang branch of the Saraswat Sangha, affiliated to Nilachal Saraswat Sangha at Biratunga under Gop Block of Puri district. His contribution towards the successful organization of the 74th Regional Devotees' Conference held in 2025 was especially memorable. His social contributions included distribution of winter clothes among the poor, widows, and underprivileged people, distribution of saplings to various educational institutions, organizing quiz competitions among devotees, and honoring meritorious participants. His service and dedication will always remain memorable in the hearts of the devotees of Nilachal Saraswat Sangha. He is survived by his wife Nilima Nanda, elder son Purnachaitanya Nanda, younger son Shaktichaitanya Nanda, two daughters-in-law, and a grandson. His last rites were performed at the cremation ground of his native village, where his elder son lit the funeral pyre.

Several dignitaries and members of the Saraswat Sangha expressed deep grief and paid tribute to the departed soul. Similarly among others, Biratunga Nilachal Saraswat Sangha President Gaganendra Mahapatra, former secretary Brahmananda Behera, Central Women's Management Committee President Subasini Behera, Vice-President Sumila Sahu, members Sudhanshubala Behera and Nirupama Behera, District Saraswat Sangha President Birakishore Barik.

Similarly among others, Biratunga Nilachal Saraswat Sangha President Gaganendra Mahapatra, former secretary Brahmananda Behera, Central Women's Management Committee President Subasini Behera, Vice-President Sumila Sahu, members Sudhanshubala Behera and Nirupama Behera, District Saraswat Sangha President Birakishore Barik.

Administrative Preparations Reviewed for Holy Rath Yatra in Puri

Puri: Ensuring smooth and timely healthcare services for lakhs of devotees during the sacred Rath Yatra remains a key priority for the district administration. With this objective, a high-level review meeting was held today at the Sadbhavana Conference Hall under the chairmanship of Puri Collector Divyajyoti Parida.

The meeting focused on strengthening and streamlining medical and emergency response arrangements during the annual festival. Discussions were held on coordinated healthcare management, deployment of medical teams, ambulance services and emergency response mechanisms to ensure the safety and well-being of devotees.

Among those present

were Puri SP Prateek Singh, Puri Municipal Corporation Commissioner S. Arugula, Additional District officials including Sharat Chandra Behera, the Chief District Medical Officer, Additional SP and senior officers from various departments. Representatives of several voluntary organisations also attended the meeting.

Officials reviewed preparedness measures related to emergency health services, crowd management support and rapid medical assistance during the Rath Yatra festivities. The administration stressed coordinated efforts among departments and volunteer groups to ensure a safe and hassle-free experience for devotees visiting the pilgrim town during the grand festival.

The meeting focused on strengthening and streamlining medical and emergency response arrangements during the annual festival. Discussions were held on coordinated healthcare management, deployment of medical teams, ambulance services and emergency response mechanisms to ensure the safety and well-being of devotees.

Major Breakthrough in Rayagada Firing and Murder Case; Total Arrests Reach 16

Rayagada : Rayagada Police have achieved a major breakthrough in the sensational firing and murder case of Nikhil Hadappa, which occurred on May 10, 2026, at Indira Colony in Rayagada town. With the latest arrests, the total number of accused apprehended in the case has risen to 16.

According to police sources, twelve accused persons had already been arrested and forwarded to court earlier during the investigation. In a fresh development, police arrested three more key conspirators from Karnataka after an

extensive multi-state operation.

The arrested accused have been identified as Chintu alias Debasis Bibhor, Paban Kalpa, and Sagar Kalpa. Police teams reportedly tracked the accused across several locations, following their movements from Visakhapatnam to Goa and finally to Hubballi in Karnataka, where they were successfully apprehended.

In another operation, accused Ajaya Devarapalli was arrested from Palnadu district of Andhra Pradesh. Police officials stated

that the accused are being brought to Rayagada following due remand procedures.

To crack the case, Rayagada Police had deployed multiple special teams across different parts of the country to trace and arrest the absconding accused. The coordinated efforts ultimately led to the successful capture of all the newly arrested suspects.

The investigation into the murder case is still underway, and police are continuing further inquiries to uncover additional details related to the conspiracy and execution of the crime.

BJD gheraoed Collectorate for women's rights

NUAPADA/KHARIAR ROAD, May 25 : Under the leadership of BJD District President Abani Ranjan Joshi, the Biju Janata Dal (BJD) and its women's wing, held protests and collectorate gheraos demanding women's rights and safety in Nuapada on May 25 (Monday).

Addressing the crowd, Bari MLA Stating that the Naveen Pattanaik Government had given 33 percent seats to women in 2019 & 2024 Lok Sabha &

general elections, "Empty vessels are now making much noise." People who have done nothing for women are now making big claim, Sri Mallick added.

Pranab Prakash also interacted with women leaders, taken blessings from them and extends gratitude towards their great support.

Sarmistha Sethy , Bari block Vice Chairperson along with all Women leaders were also targeted the government over the increasing crime against women in the state.

'Utkarsh Nimapada 2.0' to Begin from June 3, Aiming to Expand Development Vision

Puri: Deputy Chief Minister Pravati Parida on Sunday said that "Utkarsh Nimapada" is not merely a slogan, but a reflection of the government's commitment and collective resolve towards development. She urged people to work together to establish Nimapada as a model region under the vision of a developed Odisha by 2036.

Addressing a press conference at the Nimapada Town Hall, Parida announced that "Utkarsh Nimapada 2.0" will be organised on June 4. The initiative aims to preserve the culture, traditions and heritage of the Nimapada-Gop region while promoting the talent and skills of local youth.

She said a comprehensive development roadmap, prepared through consultations with experts, experienced individuals and public participation, would be implemented to build a "better Nimapada".

Earlier, on May 17, a

pathsav was organised in Nimapada with considerable public participation. During the event, the mascot, jersey and medal for Utkarsh Nimapada 2.0 were also unveiled.

Series of Sports and Social Activities Planned As part of the programme, marathons will

be organised in Nimapada on May 24 and in Gop block on May 31. From May 25 to 31, panchayat-level cricket and football tournaments for men and cycling competitions for women will be held.

June 1 will be observed as 'Seva Diwas', featuring plantation drives and village

and booth-level cleanliness campaigns. On June 2, collective sankirtan and a traditional food fair competition will be organised, followed by constituency-level sports competitions on June 3.

On June 4, the Deputy Chief Minister will present a report card and felicitate

Parida described the programme as a collective movement for the region and said public participation would play a key role in transforming Nimapada into a clean, beautiful, disciplined and developed area.

winners of various competitions.

Parida described the programme as a collective movement for the region and said public participation would play a key role in transforming Nimapada into a clean, beautiful, disciplined and developed area.

The press conference was conducted by Information and Public Relations Department Deputy Director Santosh Kumar Sethi. Among those present were BDO Dr Abhijit Sadangi, Tehsildar Dr Manoj Kumar Pradhan, SDPO Janardan Padhi and MP representative Meenalata Mohanty, along with several other dignitaries.

Cancer-stricken journalist seeks help

Keonjhar: Magan Kumar Mallick (57), a social worker and senior journalist from Kamargoda in Keonjhar city, has been admitted to the AIIMS in Bhubaneswar due to cancer. Now, lakhs of rupees are required for treatment, and the family is worried about financial problems. Mr. Mallick has always helped the helpless and homeless people at the Keonjhar District Head Hospital and has been receiving appreciation from various quarters. In this hour of grief, the family has requested the district administration and the state government to provide him with proper treatment and financial assistance.

Three minor dead, Two minor commits suicide in silly matter, another drowned in drain

Keonjhar : Three minor died in three tragic incidents that took place in different police station area of Odisha's Keonjhar district. One 15 years old killed self by hanging in iron rod in Telkoi police station area, whereas another 9 years old died consuming poison in Soso police station area after parents scold on silly matter. Another 2 years old drowned in ditch in Soso police station area.

According to the sources in Telkoi block Deulidha panchayat Jenadar village, Sumit Kisan (15) son of Babaji Kisan committing suicide after his mother scolded him while moving outside in the heat. He was completed matric examination this year and waiting for admission.

His dead body was found hanging in the under-

construction house at night and the family informed the police. The police reached and recovered the dead body and sent it to Telkoi Community Health Center for autopsy. He committed suicide by hanging his pant belt from the iron rod that was being used in under construction house. "Police have registered a case of unnatural death and an autopsy will be conducted today and the investigation is underway, said police station officer Anjan Kumar Patra. In another incident in Soso Thana area of Keonjhar district on Sunday, Lambu Munda (9), son of Laxman Munda of Podasingidi village, died after consuming poison. He was studying in class IV of Rangamatiya School. Sources said that Lambu consumed poison after a fight with his father

on a matter. Similarly, Anil Khandwi (2), son of Arun Khandei of Jhanjhana village, drowned in water today. Sources said that a pipe line has broken near Jhanjhana village. There is a road for traffic on the pipe line. Due to the bursting of the pipe line, a small artificial pond was formed on the road. Anil fell into and sank. Sources alleged that after repair of the pipe, the pipe construction company could not fill up the ditch, hence demanding compensation and action.

In both the incidents, the police have recovered the bodies and sent them for post-mortem at Anandpur Sub-divisional Hospital.

IIC Soso police station Kanan Sahu said Two separate UD cases have been registered and further investigation is on".

- The Superintending Engineer, Paralakhemundi (R&B) Division on behalf of Governor of Odisha Invites Percentage rate bid in Single & Double system to be received in an ONLINE MODE only for the construction of works as detailed in the table below:
- Nature of works : Building, Road & Electrical Works
- No. of works : 06 [Six] nos. of works
- Estimated cost (Approximately) : Rs. 62.47 Lakhs to Rs. 7.78 Lakhs
- Bid cost : Rs. 4,000/-, Rs. 6,000/- & Rs. 10,000/-
- Class of contractor : "B" // "C" // "D" Class & "HT" Class
- Availability of Bid Documents in the website : 10.00 Hrs of Dt. 02.06.2026 To 12.00 Hrs. of Dt. 17.06.2026.
- Date of opening of the Bid : 12.00 Hrs. of Dt. 18.06.2026.
- The Bidders have to participate in ONLINE bidding only. Further details can be seen from the website <http://tendersorissa.gov.in> Any Addendum /Corrigendum/Cancellation of tender can also be seen in the said website. The authority reserves the right to reject any or all bids without assigning any reason thereof.

G. Kishan Reddy Directs Agencies to Fast-Track Pending Mining & Exploration Projects During Bengaluru Review Meetings

Bhubaneswar/New Delhi : Hon'ble Union Minister for Coal & Mines G. Kishan Reddy on Monday directed all mining and exploration agencies under the Ministry to fast-track pending projects and adopt a mission-mode approach to strengthen India's mineral security and strategic growth objectives.

"All organisations must fast-track pending projects and ensure that technology, transparency and efficiency become the foundation of every institutional process. The people of India and the Government of India expect speed, accountability and visible outcomes from every agency working in this sector," the Minister said while chairing a series of high-level review meetings in Bengaluru with senior officials of the Geological Survey of India (GSI), National Institute of Rock Mechanics (NIRM), Indian Bureau of Mines

(IBM) and the Remote Sensing & Aerial Survey (RSAS) division.

The meetings focused on accelerating mineral exploration, strengthening scientific and technological capabilities, promoting sustainable mining practices and aligning institutional efforts with the national vision of Viksit Bharat 2047.

During the review, the Minister assessed ongoing projects, technological advancements and exploration activities being undertaken across the country, particularly in the field of critical and strategic minerals including Rare Earth Elements (REE), Lithium, Nickel, Cobalt, Tungsten, Vanadium and Platinum Group Elements (PGE). The organisations presented detailed updates on resource augmentation, mineral targeting, scientific surveys, mine sustainability, geospatial

technologies and advanced exploration systems being implemented to strengthen India's mineral security and strategic growth objectives.

Addressing the officials, Shri G. Kishan Reddy stated:

"Under the leadership and vision of Hon'ble Prime Minister Shri Narendra Modi Ji, India is moving decisively towards becoming a self-reliant and globally competitive economy. The mining and exploration sector has a critical role in securing India's future growth, industrial expansion and strategic mineral security."

He further directed all organisations to work in a coordinated mission-mode approach with clearly defined timelines, measurable outcomes and greater accountability.

The Minister also emphasised the importance of advanced technologies, data integration and

scientific innovation in strengthening India's exploration ecosystem.

"The future of mineral exploration lies in technology-driven systems including AI, remote sensing, integrated geoscience analytics and advanced exploration methodologies. Our institutions must lead this transformation to make India future-ready and resource-secure," he said.

The Geological Survey of India highlighted major exploration outcomes across Karnataka and Goa,

including the identification of gold, copper, PGE, nickel and cobalt-bearing zones, along with significant augmentation of mineral resources following reforms introduced under the MMDR Amendment Act, 2015. GSI also outlined its five-year roadmap involving large-scale thematic mapping, AI/ML-enabled mineral targeting and advanced-stage exploration projects covering nearly 48,000 sq. km.

The National Institute of Rock Mechanics showcased its contributions

towards nationally significant infrastructure and mining safety projects including hydropower, metro rail, tunnel engineering, seismic monitoring and controlled blasting near sensitive infrastructure. The institute also presented its capabilities in rock mechanics, engineering geology, micro seismic monitoring and geotechnical solutions supporting strategic national development projects.

The Indian Bureau of Mines reviewed progress in sustainable mining practices, operationalisation of auctioned mineral blocks, scientific mine closure, mineral beneficiation and environmental safeguards. IBM also presented findings related to critical mineral enrichment and recovery potential from existing mining

ecosystems under the National Critical Mineral Mission.

The RSAS division presented the progress achieved under the National Aereogeophysical Mapping Programme (NAGMP), including airborne geophysical surveys, hyperspectral remote sensing and AI/ML-driven mineral prospectively mapping. The review highlighted that more than 6.5 lakh sq. km. has already been covered under the programme, generating over 200 exploration projects using aero-geophysical datasets.

As part of the Bengaluru visit, Hon'ble Minister Shri G. Kishan Reddy also visited the Art of Living Foundation International Centre and interacted with members of the Art of Living family. The Minister visited the Gurukul and Exhibition Centre and appreciated the institution's efforts

towards value-based education, spiritual awareness and social transformation rooted in India's cultural heritage.

The Minister also had the privilege of interacting with Sri Sri Ravi Shankar and sought his blessings. Reflecting on the visit, Shri G. Kishan Reddy said:

"India's development journey towards Viksit Bharat 2047 must be guided not only by economic progress and technological advancement, but also by spiritual consciousness, cultural values and a spirit of collective service towards society."

The visit concluded with a renewed emphasis on nation-building through scientific progress, sustainable development, cultural values and institutional excellence in alignment with the vision of Viksit Bharat 2047.

Cockroach Controversy

AMID an economic crisis and the NEET fiasco, the traction gained by the Cockroach Janta Party (CJP) on social media reflects the discontent among India's youth, particularly the jobless ones. This online movement has revealed that a generation frustrated by unemployment, exam scandals and political apathy is turning to satire as a form of democratic expression. What began as a sharp response to the Chief Justice of India's remark comparing a section of youngsters with "cockroaches" has quickly evolved into a wider conversation about youth unrest, accountability and freedom of dissent. The symbolism of the cockroach is central to the

movement's appeal. Usually seen as a pest, the insect has been reimagined by CJP supporters as a metaphor for resilience. Their message is loud and clear: the ignored young citizens of India have somehow survived, and they will have their say.

The CJP's rapid popularity has prompted the ruling BJP to launch a counter-attack. Several party leaders have alleged that the platform is drawing social media support from Pakistan. However, the CJP's founder, Abhijeet Dipke, has claimed that over 94 per cent of its followers are from India. Dipke's allegations of account restrictions, hacking and platform takedowns have raised uncomfortable questions about democratic space in the digital age. Attempts to suppress satire strengthen the perception that the government is not receptive to criticism. Democracies are considered healthy when dissent is allowed to be expressed peacefully.

The rise of this protest movement should prompt all stakeholders to look within, be it the political class, the bureaucracy, the judiciary or the media. The CJP may or may not be able to establish itself as a durable force, but its emergence carries an unmistakable warning: beneath the memes lies a generation demanding dignity, opportunity and a voice in shaping the nation's future.

Elderly Dealing

THE Punjab and Haryana High Court's ruling directing a son to provide his elderly mother a room, separate bathroom and basic amenities in the family home is more than a legal order. It is an indictment of a society increasingly failing its parents. Invoking the timeless dictum "matru devo bhava", the court reminded citizens that filial duty is not merely cultural ornamentation but a legal and moral obligation. The facts of the case are deeply unsettling. An elderly woman had to seek judicial intervention simply to secure a habitable corner in the house built by her late husband. That a mother should be compelled to fight her own children for shelter and dignity reflects the erosion of the joint family ethos that once defined Indian society. The high court was justified in rejecting the son's plea and imposing costs upon him.

Courts across the country are increasingly confronting disputes involving abandoned or harassed parents. In several rulings, tribunals and high courts have ordered eviction of abusive children, upheld parents' rights over self-acquired property and reinforced the Maintenance and Welfare of Parents and Senior Citizens Act, 2007. At the same time, the judiciary has carefully balanced welfare concerns with property rights, ensuring that the law is not misused in family feuds.

The larger concern, however, cannot be addressed through courtrooms alone. India's rapidly ageing population, urban migration and shrinking family structures are creating conditions where many senior citizens face loneliness, insecurity and economic dependence. Legal safeguards are essential, but social attitudes matter even more. A civilisation that reveres motherhood in scripture cannot abandon mothers in practice. Providing elderly parents with respect, care and security should not require judicial enforcement. The high court's verdict rightly emphasises that inheritance may be negotiable, but humanity is not.

In several rulings, tribunals and high courts have ordered eviction of abusive children, upheld parents' rights over self-acquired property and reinforced the Maintenance and Welfare of Parents and Senior Citizens Act, 2007. At the same time, the judiciary has carefully balanced welfare concerns with property rights, ensuring that the law is not misused in family feuds.

Celebrating Without Transformation

PRASANNA MISHRA

India today lives amidst a curious contradiction. On television screens, in policy conferences, in glowing international headlines, and increasingly among sections of the intelligentsia, the nation is portrayed as an unstoppable rising power — the world's fastest-growing major economy, a digital giant, a geopolitical swing state, and the future engine of global growth. Yet outside these carefully curated narratives stands another India: millions of young men riding motorcycles through crowded streets delivering food parcels, groceries, medicine, and consumer goods to an urban middle class that celebrates convenience as progress. The delivery boy has quietly become the emblem of India's development model. This is not merely an economic irony. It is a civilizational warning.

No country can become a genuinely developed society by converting its demographic dividend into a vast reserve of insecure labour serving consumption-driven urban elites. A nation that once dreamed of scientific modernity, industrial self-reliance, intellectual confidence, and social transformation now risks normalising precarious employment as a sign of economic dynamism.

The deeper tragedy is that much of India's educated class — journalists, commentators, influencers, economists, corporate strategists, and sections of academia — increasingly participates in glorifying this condition. They celebrate digital transactions while remaining silent about the collapse of productive manufacturing employment. They applaud start-up valuations while ignoring the erosion of stable livelihoods. They praise "ease of doing business" while millions struggle for the ease of surviving.

India's development discourse has become strangely detached from the lived experience of ordinary citizens.

Economic growth indicators do matter. Roads matter. Digital systems matter. Infrastructure matters. Financial inclusion matters. But growth acquires legitimacy only when it expands human capability, deepens social dignity, enhances intellectual confidence, and creates productive human resource engagement and useful employment.

The central question therefore is not whether India is growing. The real question is: growing into what? A healthy economy transforms labour into productivity. A weak economy merely reorganises insecurity.

Across Indian cities, one increasingly encounters educated youth

working in app-based services with little social protection, unstable income, long working hours, and almost no upward mobility. These jobs are often described as "entrepreneurial flexibility," but such language frequently disguises the absence of structural opportunity. The celebrated gig economy is not necessarily evidence of innovation. In many cases, it is evidence of the failure to create large-scale, high-productivity manufacturing and knowledge-sector employment.

An economy becomes truly transformative when a worker can gradually move from low-productivity to higher-productivity occupations. When skills deepen. When wages rise. When industrial ecosystems generate technological competence. When ordinary families begin imagining a better future for their children.

The contrast with countries like China, South Korea, and Vietnam is deeply instructive.

These countries did not merely chase GDP numbers. They transformed the material foundations of society.

China built manufacturing capacity on a civilizational scale. It absorbed millions from low-productivity rural work into industrial employment. Entire ecosystems of supply chains, logistics, ports, research institutions, technical education, and export industries emerged together. The result was not merely economic growth but social transformation. A factory worker's child could aspire to engineering, research, entrepreneurship, or urban middle-class life.

South Korea achieved something even more remarkable. Emerging from war and poverty in the mid-twentieth century, it invested intensely in education, industrial competence, technology, and national discipline. It created globally competitive industries — automobiles, shipbuilding, semiconductors, consumer electronics — not merely platforms for urban consumption. Its transformation produced not only wealth but confidence, social mobility, and intellectual ambition.

Vietnam, despite immense historical trauma, followed a pragmatic path of export-oriented manufacturing integrated with global supply chains. It focused on labour-intensive industry, vocational capability, and competitive production. Today, global manufacturers increasingly look at Vietnam not as a market to sell into, but as a country capable of producing.

That distinction matters. A nation that mainly consumes remains dependent. A nation that

produces and acquires strategic autonomy.

India, despite its immense talent and population, has often appeared trapped between aspiration and execution. The country speaks the language of global power while large sections of its workforce remain underemployed, informally employed, or precariously employed.

One reason for this distortion lies in the political economy of contemporary India.

Modern politics increasingly rewards spectacle over structural transformation. Mega-events, media narratives, slogans, centralised personality cults, and endless digital messaging create the perception of national resurgence. Citizens are encouraged to emotionally consume nationalism while materially adjusting to stagnation. In such an environment, criticism itself begins to be viewed unkindly.

The political class benefits from this arrangement because perception management becomes easier than long-term institution building. Real transformation is difficult. It requires educational reform, judicial efficiency, scientific temper, decentralised governance, industrial policy, labour-intensive manufacturing, agricultural productivity, urban planning, and institutional accountability.

But spectacle offers quicker rewards.

The tragedy is not merely political. Sections of the intelligentsia have become participants in this culture of exaggeration. Instead of functioning as independent moral critics of power, many increasingly operate as amplifiers of official optimism.

A democracy weakens when intellectual classes stop asking uncomfortable questions.

Perhaps the gravest issue is not economic but intellectual.

A developed society does not merely produce infrastructure; it produces thinking citizens. It cultivates curiosity, reasoning, creativity, scientific temperament, artistic depth, and moral independence.

India's public discourse, however, increasingly appears dominated by emotional polarisation, shallow media cycles, performative outrage, and slogan-driven politics. Serious reading declines. Public reasoning weakens.

A population trapped in permanent economic anxiety also finds it difficult to cultivate intellectual freedom. When survival itself becomes exhausting, citizenship gradually shrinks into spectatorship.

This is why the quality of employment matters far beyond economics. A society of insecure workers cannot easily become a society of intellectually confident citizens.

The delivery worker rushing through traffic under algorithmic pressure becomes symbolic not merely of economic precariousness but of a larger civilizational exhaustion — human beings converted into endlessly measurable units of speed, ratings, and efficiency. Meanwhile, leadership is celebrated in increasingly mythic language.

No democracy should place leaders beyond scrutiny. Democratic maturity lies not in worshipping authority but in continuously evaluating whether power has genuinely improved the lives and capacities of ordinary citizens.

For real development, the country needs: Large-scale manufacturing capable of employing millions productively; massive investment in public education and research; vocational and technical capability linked directly to industry; urbanisation that preserves dignity rather than producing exclusion; public healthcare and social protection systems that reduce insecurity; decentralised governance that empowers local institutions; a cultural environment that values scientific reasoning and intellectual freedom; an economic philosophy centred not merely on billionaires and market valuations, but on the enhancement of human capability.

Most importantly, India needs honesty.

A nation cannot permanently sustain itself on exaggerated self-congratulation. The distance between propaganda and lived reality eventually produces cynicism, anger, and social fragmentation. True patriotism does not consist in endlessly praising the state. It consists in demanding that the nation live up to its civilizational promise.

India's greatness will not be measured by the number of billionaires it produces, nor by the volume of political adulation surrounding leaders. It will be measured by whether ordinary citizens acquire dignity, intellectual confidence, meaningful work, social mobility, and the freedom to think without fear.

The ultimate purpose of development is not to create obedient consumers or exhausted service workers. It is to create fully realised human beings.

That remains India's unfinished task.

(The writer is a former IAS officer)

Super El Niño's Trillion-Dollar Warning

Raghunath Mahapatra

The Pacific Ocean is warming again. Climate agencies, including NOAA and the WMO have indicated higher probability of a strong El Niño developing by late 2026, with some climate models even pointing toward possible Super El Niño conditions. El Niño arrives differently from conventional disasters: as slow Pacific heat redistribution that later transmits into food inflation, fiscal stress, power shortages and economic slowdown. At peak intensity, it behaves less like weather and more like a trillion-dollar macroeconomic shock embedded in the global cycle.

Peruvian fishermen in the late 19th century first noticed unusually warm Pacific waters appearing near Christmas, reducing fish catches along the coasts of Peru and Ecuador. They called it El Niño de Navidad: "the Christ Child." Scientists later shortened the name to El Niño. It is not an abnormal event but a recurring climate cycle that appears every 2-7 years as part of the El Niño-Southern Oscillation (ENSO). During an ordinary El Niño, sea-surface temperatures in the central and eastern Pacific typically rise by about 0.5°C-1.5°C above average, weakening trade winds and altering rainfall patterns across continents. The Pacific is uniquely capable of driving this phenomenon because no other ocean possesses the same scale of equatorial width, heat storage and ocean-atmosphere coupling capable of reorganising global weather systems on such a scale.

Historically, many El Niño events remained within manageable climatic and economic limits. A Super El Niño,

For India, the concern is no longer theoretical. The extreme heat spreading across large parts of the country this summer offers a preview of how climate volatility is already entering the economy through energy demand, food systems and public health. Temperatures crossing 45-48°C in several regions have already pushed electricity demand toward record levels. Monsoon volatility, meanwhile, quickly translates into agricultural output loss, food inflation, rural demand contraction and fiscal pressure. For decades, climate was treated as external to economic modelling: a background variable rather than a core determinant of inflation, productivity and fiscal stability.

however, is different in both intensity and consequence. It emerges when Pacific warming becomes exceptionally strong: often crossing nearly 2°C above average in key regions. Beyond this threshold, climate disruptions become simultaneous and globally amplified. Monsoon failures, crop losses, heat-waves, wildfires, water shortages, food inflation and energy disruption reinforce one another across economies rather than remaining isolated regional events. Super El Niño is therefore studied separately not merely because it is warmer, but because its economic effects become structurally harder to absorb and far more difficult to manage.

A 2023 Science study by Dartmouth researchers estimated that the 1982-83 and 1997-98 Super El Niño events caused global income losses of roughly \$4.1 trillion and \$5.7 trillion respectively, while projections suggest the economic effects of the 2023-24 El Niño could cumulatively approach \$3 trillion by 2029. These are not temporary disruptions but persistent growth losses. As climate economist Christopher Callahan observed, "Societies and economies absolutely do not just take a hit and recover." The historical record also reinforces this warning: the 1982-83 cycle devastated Peruvian fisheries and

intensified droughts, the 1997-98 events triggered Indonesian fires and Asian crop failures, while the 2015-16 episode affected over 60 million people globally. Each successive cycle has unfolded in a more interconnected and climate-sensitive world economy, magnifying shocks across food, energy, trade and finance.

What makes the 2026 concern more serious is the planetary baseline on which it may unfold. Ocean heat content is already near record highs after successive years of elevated sea-surface temperatures, reducing the system's cooling "reset" window. A future El Niño would therefore develop not on a neutral climate baseline but on a pre-warmed ocean-atmospheric system, increasing the probability of sharper climatic and economic shocks. In economic terms, shocks no longer arrive on stable cycles but on compressed recovery phases, where previous disruptions have not fully cleared. The result is cumulative vulnerability rather than cyclical risk.

For India, the concern is no longer theoretical. The extreme heat spreading across large parts of the country this summer offers a preview of how climate volatility is already entering the economy through energy demand, food systems and public health. Temperatures crossing 45-48°C in

several regions have already pushed electricity demand toward record levels. Monsoon volatility, meanwhile, quickly translates into agricultural output loss, food inflation, rural demand contraction and fiscal pressure. For decades, climate was treated as external to economic modelling: a background variable rather than a core determinant of inflation, productivity and fiscal stability.

That assumption is now breaking, particularly in India and in other developing economies where food systems, water security, employment and energy demand remain deeply climate-sensitive. India has improved forecasting through IMD, expanded crop insurance under PMFBY and strengthened food-buffer systems. Yet these remain largely reactive instruments designed for cyclical shocks rather than repeated macro-climate stress. The next phase of preparation must therefore include climate-resilient agriculture, heat-adapted infrastructure, water-system reform and climate-linked fiscal planning.

Once again the Pacific is warming. The warning is not meteorological alone: it's macroeconomic and civilizational. For economies like India, the central question is whether growth can remain stable in the long run under repeated climate stress without losing momentum, equity or resilience. Super El Niño is no longer merely a forecast. It is becoming a test of development itself. For India, where monsoon stability still shapes agriculture, inflation and rural demand, the trillion-dollar warning of Super El Niño is ultimately a warning that climate resilience is no longer an environmental safeguard alone, but a precondition for stable development itself.

Kejriwal, Sisodia To Join Proceedings; Delhi HC Lists Excise Policy Case For July 16

New Delhi, 25/5: The Delhi High Court on Monday adjourned till July 16 the hearing on a plea filed by the Central Bureau of Investigation (CBI) challenging the discharge of former Chief Minister of Delhi and AAP National Convenor Arvind Kejriwal, former Deputy Chief Minister of Delhi Manish Sisodia and others, in the alleged excise policy corruption case.

A single-judge Bench of Justice Manoj Jain took on record the submission that 'vakalatnamas' have been filed on behalf of Kejriwal, Sisodia and AAP leader Durgesh Pathak, who had earlier abstained from participating in the proceedings when the matter was being heard by Justice Swarana Kanta Sharma. During the hearing, Solicitor General Tushar

Mehta, the Centre's second-highest law officer, submitted that the CBI had already filed an affidavit of service on Kejriwal, Sisodia and Pathak. Referring to the earlier proceedings, SG Mehta contended that the respondents had earlier appeared in the matter and even moved recusal pleas, which were rejected. Taking note of

the development, Justice Jain observed that since 'vakalatnamas' had now been filed, the Delhi High Court would hear all parties on the next date of hearing and draw up a schedule for the proceedings. The judge then listed the matter for further hearing on July 16. The matter came before Justice Jain after it

was reassigned from the Bench of Justice Swarana Kanta Sharma, as criminal contempt proceedings were initiated against several AAP leaders, including Kejriwal, Sisodia, and Sanjay Singh, over the alleged circulation of "vilifying and defamatory" material targeting the judiciary in connection with the excise policy case. The AAP leaders had decided to abstain from participating in the proceedings after Justice Sharma declined to recuse herself from hearing the case. Last week, Justice Jain had issued fresh notices to Kejriwal, Sisodia and Pathak after observing that several respondents had failed to appear or file their replies despite repeated opportunities. In the previous hearing, SG Mehta had urged the Delhi High Court to

take up the matter expeditiously, contending that the trial court's discharge order "cannot stand scrutiny of law" and involves serious allegations. The trial court, in a judgment running into more than 1,100 paragraphs delivered on February 27, had discharged all accused persons in the corruption case lodged by the CBI, holding that the now-scrapped excise policy was the outcome of a consultative and deliberative process and that the prosecution had failed to establish any overarching conspiracy. In its revision plea before the Delhi High Court, the CBI has alleged that the excise policy introduced by the then AAP-led Delhi government was manipulated to favour select liquor traders in exchange for kickbacks.

AIADMK Split Widens as Three MLAs Resign to Join TVK

NEW DELHI, 25/5: The political crisis within the AIADMK intensified on Monday after three party MLAs — Maragatham Kumaravel, Sathyabama, and Jayakumar — resigned from the Tamil Nadu Assembly and met TVK leader Aadhav Arjuna in Chennai. Assembly Speaker JCD Prabakaran received their resignation letters and began reviewing them. Once accepted, bypolls will be held in Madurantakam, Dharapuram, and Perundurai, reducing AIADMK's strength from 47 to 44 seats. The resignations follow the party's recent electoral defeat and growing internal rift. Sources said the three legislators expressed dissatisfaction with the leadership and decided to align with the Tamilaga Vettri Kazhagam (TVK), led by Chief Minister Vijay. The split widened after the floor test earlier this month, when 25

AIADMK MLAs led by CV Shanmugam voted in favour of TVK. The test turned into a showdown between factions loyal to General Secretary Edappadi K Palaniswami and Shanmugam. Vijay's TVK secured 144 votes, comfortably passing the test. Senior leader S Semmalai also quit the party last week, citing "immense mental anguish" over recent developments. His exit and the latest resignations have deepened the crisis, leaving AIADMK struggling to retain unity and relevance in Tamil Nadu's shifting political landscape.

Marco Rubio, Wife Jeanette Visit Taj Mahal And Jaipur's Amber Fort

Agra, 25/5: US Secretary of State Marco Rubio and his wife Jeanette Rubio visited the iconic Taj Mahal in Uttar Pradesh's Agra and the Amber Fort in Rajasthan's Jaipur, on Monday. US Ambassador to India Sergio Gor also accompanied them during their visit to both places. Sharing pictures from their visit, Gor stated, "Wonderful to be back at the iconic Taj Mahal with Secretary Rubio, Jeanette Rubio and Robert Gabriel. A breathtaking symbol of India's extraordinary heritage and craftsmanship." Last year, US Vice President J D Vance, along with his wife and three children, also visited Taj Mahal during his official visit to India. Later, Rubio and his wife travelled to Jaipur as part

their India visit. This was Rubio's first visit to Jaipur. Preparations for a ceremonial reception were being held at Jaleb Chowk inside the historic fort complex since early morning. Folk artists and cultural troupes were mobilised to showcase Rajasthan's traditional heritage

and cultural performances as part of the welcome ceremony. In view of the high-profile visit, the Jaipur district administration, police and security agencies were placed on a high alert. Officials inspected travel routes, event venues and accommodation facilities

linked to the visit. Security agencies are maintaining close surveillance at hotels, tourist sites and locations earmarked for the VVIP movement. A detailed traffic and crowd management plan has been prepared to ensure smooth movement and avoid disruptions during Rubio's stay. Civic agencies have intensified cleanliness drives, lighting arrangements and beautification work at major tourist sites, particularly Amber Palace, ahead of the visit. Rubio is currently on a four-day visit to India from May 23 to 26, covering Kolkata, Agra, Jaipur and New Delhi. The visit is focused on strengthening cooperation between India and the United States in areas such as trade, defence, energy and strategic affairs.

New Delhi, 25/5: The Supreme Court on Monday sought replies from the Centre, the National Testing Agency (NTA), and the Central Bureau of Investigation (CBI) on petitions demanding the replacement of the NTA with an autonomous body to conduct the NEET medical examination. A bench of Justices PS Narasimha and Alok Aradhe heard multiple pleas that called for shifting NEET entirely to a computer-based format and criticised the recurring paper leak controversies. The court remarked that authorities "have not learnt their lessons" from past incidents and directed the NTA to file a counter affidavit detailing compliance with recommendations made by a court-appointed monitoring committee after the 2024 NEET leak. The bench also asked the chairman of the monitoring

committee to ensure compliance with its directions. The case has been listed for further hearing on May 29. The Federation of All India Medical Association (FAIMA) and United Doctors Front (UDF) filed petitions urging the court to replace or overhaul the NTA and establish a secure mechanism for conducting NEET. On May 12, the NTA cancelled NEET-UG 2026 held on May 3 after allegations of a paper leak. A re-exam is

scheduled for June 21. The government directed the CBI to investigate irregularities, and so far, 11 accused have been arrested from Delhi, Jaipur, Gurugram, Nasik, Pune, Latur, and Ahliyanagar. The controversy has intensified demands for transparency and accountability in India's largest medical entrance exam, with students and doctors calling for reforms in examination procedures.

MP: Bodies Of Two Missing Youths Recovered In Dhar River After 15-Hour Rescue Operation

Bhopal/Dhar, 25/5: Two youths, who were reportedly employees of a private cement company, drowned in the deep waters of the Narmada River while bathing at the Semalda Narmada Ghat in Manawar tehsil of Dhar district, officials said on Monday.

The incident happened on Sunday evening. After a prolonged rescue operation lasting nearly 15 hours, divers recovered the bodies of both young men on Monday morning. The deceased have been identified as Pooran Yadav and Dinesh Yadav, both residents of Kotputli in Rajasthan, police officials said. They were employed at the company's plant in Tonki, Manawar. On Sunday, the four friends — Pooran Yadav, Dinesh Yadav, Manoj Yadav, and Naveen Yogi — had gone to the Semalda Narmada Ghat around 5 p.m. to relax and bathe in the river during their weekly off day. While bathing, Pooran and Dinesh suddenly drifted into a deeper section of the river, approximately 15 to 20 feet deep, and were caught in a strong current. Their companions and local boatmen immediately launched a rescue attempt, but the strong flow of the river made it impossible to save them. Naveen Yogi, one of the survivors, recounted that he and Manoj had stayed in the shallower part and were watching their friends when the incident occurred. Upon receiving information, Manawar police and administrative officials reached the spot and initiated a search operation with the help of local villagers and boatmen.

Delhi Police Solves Mobile Theft Case Within 12 Hours; 72 Stolen Phones Recovered, 40 Cases Worked Out

New Delhi, 25/5: The South District Police of Delhi on Monday said that it had solved a mobile theft case within 12 hours, leading to the recovery of 72 stolen mobile phones, the arrest of three habitual offenders, and the working out of 40 theft cases registered across Delhi. According to Delhi Police, the operation was carried out by the team of Police Station Mehrauli through extensive CCTV analysis, technical surveillance, local intelligence gathering, and prompt field action. Police said the case began on May 15, when a PCR call regarding the theft of a mobile phone near a bus stand was received at PS Mehrauli.

Subsequently, the complainant lodged an online theft complaint vide e-FIR No. 80039965 under Section 303(2) of the Bharatiya Nyaya Sanhita (BNS). During the enquiry, the complainant informed police that two "suspicious" boys had been standing near her immediately before the theft took place. Taking the complaint seriously, police began analysing CCTV footage from the surrounding area and simultaneously developed local intelligence. In view of the increasing incidents of mobile theft in the area, a dedicated team was constituted under the supervision of the SHO of PS Mehrauli.

'Better to Have a Divorced Daughter Than...': Explosive Remarks During Supreme Court Hearing in Twisha Sharma Case

NEW DELHI, 25/5: The Supreme Court on Monday made a series of powerful observations while hearing the controversial death case of Twisha Sharma, a 32-year-old woman found dead at her matrimonial home in Bhopal. The matter was heard by a bench led by Surya Kant along with Justices Joymalya Bagchi and Vipul M Pancholi. The top court also directed that the probe be handed over to the Central Bureau of Investigation, citing the need for an impartial investigation amid allegations of institutional bias. 'Better to Have a Divorced Daughter Than...'. One of the most discussed remarks during the hearing came from Solicitor General Tushar Mehta. During arguments, Mehta reportedly

said: "Better to have a divorced daughter than to face such an unfortunate incident." The statement quickly gained attention online as the hearing focused on allegations of dowry harassment, investigative lapses and public controversy surrounding the case. Supreme Court 'Pained' by Public Narrative The Supreme Court expressed concern over claims that members of the judiciary were influencing or shielding the accused. The court observed that it was "slightly in pain" over the public narrative developing around the case. "We are slightly pained at the developments," the bench remarked while stressing the importance of allowing the legal process to proceed fairly. The

accused in the case, Samarth Singh, is reportedly a practising lawyer, while his mother Giribala Singh is a former district judge. The Supreme Court confirmed that the only issue remaining was formal consent for the CBI investigation to proceed. "The only issue as of now survives for consideration is consent to the recommendation for CBI probe," the bench stated. The court said an independent investigation would help restore confidence and ensure fairness for all parties involved. The bench strongly urged the media to avoid sensationalising the matter and requested restraint in interviewing family members or potential witnesses. "We will request our media friends not to

go for statements of the victim's family or the other family," the court said. The judges warned against turning witness statements and grieving family reactions into "sound bites," saying such coverage could prejudice the investigation. Twisha Sharma Family Raised 'Institutional Bias' Concerns Senior advocate Sidharth Luthra, appearing for Twisha Sharma's family, argued that the case involved concerns of institutional bias and delays in filing the FIR. The family has alleged dowry harassment, torture and possible foul play. Meanwhile, the accused family has denied wrongdoing and reportedly claimed Sharma was battling personal issues.

Amit Shah to undertake multi-state border tour to review security preparedness

New Delhi, 25/5: Union Home Minister Amit Shah will embark on an extensive multi-state tour of India's border regions beginning Monday night, in a move aimed at reviewing the security architecture and enhancing coordination among various agencies tasked with safeguarding the country's frontiers. The visit comes as part of the Centre's continued focus on strengthening border management amid evolving security challenges. Official sources told ANI that the tour will cover key border states, including Rajasthan, Gujarat, Tripura, and West Bengal, reflecting the government's intent to assess preparedness across both western and eastern sectors. The first leg of the visit will

commence with Shah's arrival in Rajasthan's Bikaner on the night of May 25 (Monday). On May 26, sources said, the Home Minister is scheduled to visit the Border Security Force (BSF) outpost at Sanchu, located along the India-Pakistan border. During the visit, he will interact with BSF personnel deployed in the region, gaining first-hand insights into operational challenges and ground realities faced by troops stationed in harsh and remote conditions. In addition to engaging with security personnel, Shah will also inaugurate a series of welfare initiatives aimed at improving the living and working conditions of the forces. These initiatives are part of a broader

effort by the government to boost morale and ensure the well-being of personnel serving in demanding environments. Later in the day, the Home Minister will chair a high-level review meeting in Bikaner to assess the overall security situation in the border districts. The meeting is expected to bring together senior officials from the Ministry of Home Affairs, representatives of the Rajasthan government, top BSF officers, and administrative and police heads from five bordering districts. Discussions are likely to focus on coordination mechanisms, intelligence sharing, and measures to counter cross-border threats. Following his Rajasthan visit, Shah will travel

to Bhuj in Gujarat on May 29. There, he will inspect another BSF border outpost and visit the strategically significant Harami Nala area. The region, located along the India-Pakistan border in the Rann of Kutch, has long been considered sensitive due to its challenging terrain and history of infiltration attempts. Officials further indicated that the Home Minister's visit shows the Centre's emphasis on maintaining heightened vigilance in vulnerable zones. The Home Minister's itinerary also includes a visit to Tripura on June 5, where he will review security arrangements along the India-Bangladesh border. The northeastern region has its own unique set of

challenges, including issues related to illegal crossings and smuggling, making regular assessments crucial for effective border management. Around mid-June, Shah is expected to visit West Bengal — another key border state sharing a long international boundary with Bangladesh — where the Bharatiya Janata Party (BJP) gained a majority for the first time by defeating incumbent Trinamool Congress and forming its government earlier this month. During the West Bengal visit, the Home Minister will evaluate the security situation and review ongoing measures to strengthen surveillance and enforcement along the border.

Officials said the multi-state tour is part of a comprehensive strategy to reinforce border security through regular monitoring, improved inter-agency coordination, and infrastructure development. It also reflects the government's focus on direct engagement with personnel on the ground, ensuring that policy decisions are informed by operational realities. These visits are expected to result in a renewed push for modernisation, enhanced surveillance systems, and welfare measures for forces, as India continues to prioritise robust and responsive border management in the face of emerging threats.

Iran Says Conclusion Reached On Several Issues With US, But Agreement Not Imminent

Tehran,25/5: Iran's Foreign Ministry spokesperson Esmail Baqaei on Monday said that a conclusion has been reached on a large portion of issues under discussion with the US although no specific timeframe has been set for finalising any understanding, local media reported. Addressing a press conference on Monday, Baqaei said no one can claim that the signing of an agreement is imminent, adding that political behaviour in the US was somewhat inconsistent, Iran's semi-official Tasnim News Agency reported. Baqaei stated that US' contradictory stance within hours complicates any negotiation process. He said that decision making in Washington is disorganised. He spoke about several resignations, congressional opposition, public opinion, and internal contradictions in the US, adding that this situation has created space for the influence of certain actors, including those from the Israeli regime. Regarding reports on timeframe for discussions, Baqaei said that no specific deadline has been set to finalise the understanding. He

expressed Iran's commitment to reaching a result that secures the rights of Tehran, emphasising that what matters most for Iran is protecting its national interests and that any outcome will be announced after it is achieved. On discussions within a 60-day framework, he said that the plan is to discuss certain details regarding the memorandum and other issues within that period, stressing that one of the topics is connected to nuclear matters. He stated that Iran is not discussing

nuclear details at this stage and the 14-article memorandum is focused on ending the war, Tasnim News Agency reported. On Sunday, US Secretary of State Marco Rubio said that "significant progress" has been made in diplomatic efforts involving the US and Iran, while indicating that a "good news" regarding the Strait of Hormuz could emerge soon. Addressing a joint press conference with External Affairs Minister (EAM) S Jaishankar in New Delhi, Rubio had said, "I do think perhaps

there is the possibility that over the next few hours the world will get some good news, at least with regards to the straits and with regards to a process that can ultimately leave us where the President wants us to be and that is a world that no longer has to be in fear or worry about an Iranian nuclear weapon and so, I do think there's some good news on that front, but not final news on that front. But, perhaps a little bit later today, we'll have more to say. But, some progress has been made. I don't want to downplay that. But I also want to caveat it by saying we still have some work to do, we will see." Rubio reiterated US President Donald Trump's stance that Iran can never possess a nuclear weapon. He said, "... The ultimate goal is that Iran can never have a nuclear weapon. Iran can never possess a nuclear weapon. The President has been clear about that they will never possess a nuclear weapon, certainly not as long as Donald Trump is President of the United States." He stressed that the US and its partners in the Gulf region have been working on an outline

that could lead to a completely open Strait of Hormuz without tolls. However, he mentioned that it requires that Iran fully accepts and implements it. "Related to that is this issue of the straits. This is an international waterway. They don't own it. It's an international waterway and what they are doing now is basically they are threatening to destroy commercial vessels using an international waterway, that is illegal under any concept of international law that governs us. But, if we allowed that to become normal, we would be normalising an unacceptable status quo and setting a dangerous precedent that could be replicated here in this region and in multiple places around the world. So, the desire, the President has, his preference is to find a diplomatic way that these problems can be solved that's always the President's preference. He would have much rather have me and the Department of State solve this problem than the Department of War having to solve this problem but the problem is going to be solved one way or the other," he added.

Nine Dead, 11 Missing After Heavy Rain Lashes China's Chongqing

Beijing,25/5: Nine people were killed and another 11 were unaccounted for as of Monday afternoon after heavy rain, which started on Saturday night, battered Yongchuan District in southwest China's Chongqing Municipality, local authorities stated. Rescue and response efforts are still underway, Xinhua news agency reported. A sudden and extreme catastrophic rainstorm struck Yongchuan, triggering flash floods and geological disasters in multiple areas of this district, from Saturday night to early Sunday morning. Meanwhile, the death toll from heavy rainfall in Shimen County, central China's Hunan Province, rose to seven on Sunday, with 14 others still missing, local authorities said. The severe downpour started at 7 am on Sunday. It is the first round of torrential rain to hit the county this year. A total of 23 townships and districts have been affected, according to the municipal emergency management bureau of Changde City, which administers Shimen. Some areas in Hunan have been hit by severe flooding, resulting

in heavy casualties and property losses. Continuous heavy rainfall has lashed the province's Shimen County, leaving five people dead and 11 others missing, according to local authorities. Also, last week, four people were confirmed dead, and five others remain missing after sudden, extremely heavy rainfall triggered severe flooding and landslides in Guiding County, southwest China's Guizhou Province, local authorities said. Among the missing, five were added following further investigation, according to the county's emergency management and production safety committee. Search and rescue operations are underway. China's national commission for disaster prevention, reduction and relief, on May 19, activated a Level-IV disaster relief emergency response for Guizhou Province following severe flooding and geological disasters, according to the Ministry of Emergency Management. China has a four-tier emergency response system, with Level I being the most severe response. Heavy rainfall and flooding have struck southern and central China in recent days.

US Iran peace framework signals full return of Strait of Hormuz shipping within thirty days

NEW DELHI,25/5: Diplomatic negotiations between Washington and Tehran appear on the verge of restoring maritime operations across the Strait of Hormuz following months of intense regional conflict. Emerging drafts of a potential settlement suggest shipping operations will finally normalize within thirty days of formal signing. According to updates from the Tasnim news agency, this proposed framework aims to lift existing naval blockades entirely while simultaneously releasing specific frozen overseas assets belonging to Iranian authorities during its critical initial phase. Resolving this standoff represents a major diplomatic priority for numerous allied nations depending on stable trade routes. Conflict escalation earlier this year severely disrupted international supply chains, forcing daily vessel crossings down significantly from pre-war averages of nearly 140 ships. Brent crude prices surged over forty percent directly due to these restrictive maritime conditions, triggering severe

inflationary pressures on fuel and essential food supplies globally. Stabilizing these specific waterways carries profound economic weight for rapidly developing nations. For instance, in India, industrial hubs and coastal states like Odisha depend heavily on uninterrupted crude oil imports to sustain domestic manufacturing and manage everyday energy costs. Reaching a finalized agreement quickly would effectively ease this mounting financial pressure on interconnected global economies, allowing commodity markets to finally stabilize. Recent public statements from high-ranking diplomats indicate genuine forward momentum, even though formal documents currently remain unsigned. US Secretary of State Marco Rubio highlighted notable advancements during his recent diplomatic visit to India, carefully noting that final terms are still under active review and negotiation. United States President Donald Trump echoed these positive sentiments on social media platforms, stating that designated leaders have largely

determined the core framework of the arrangement. Final intricate details are expected shortly. Regional political actors, particularly intermediaries in Pakistan, have reportedly played crucial roles in facilitating these delicate communications between historically adversarial administrations. Despite apparent progress on restoring maritime security, significant diplomatic hurdles remain regarding advanced weapons proliferation. Iranian state media outlets indicate that negotiators have completely separated immediate naval navigation agreements from broader, historically fraught discussions regarding uranium enrichment restrictions. The current working draft establishes a subsequent sixty-day window specifically dedicated to addressing these highly specialized concerns. Separating these complex issues theoretically allows immediate relief for international shipping routes while giving seasoned diplomats additional time to tackle highly sensitive national security parameters without holding global commerce hostage.

Over 1.5 Million Hajj Pilgrims Arrive In Mecca; Riyadh Increases Air Defence

Mecca,25/5: Over 1.5 million people have arrived in Mecca for the annual Hajj pilgrimage, which this year takes place amid hopes for an end to the war in West Asia. To protect them, the Saudi Ministry of Defence has strengthened its air defences. The white-clad pilgrims, travelling by bus or on foot, arrived at the vast Mina encampment after performing the "tawaf," or walking seven times around the Kaaba, the enormous black cube of Mecca's Great Mosque. The start of the Hajj coincided with US President Donald Trump sending mixed signals regarding a possible agreement to extend the fragile ceasefire with Iran and a deal to reopen the Strait of Hormuz, reports Adnkronos news agency. This year's celebrations, which draw Muslims from around the world, including Iran, follow a series of Iranian attacks against targets in Saudi Arabia and neighbouring Gulf countries. Saudi authorities

have worked to keep the conflict away from the Hajj, with many Muslims travelling long distances to participate in one of the world's largest annual pilgrimages. Despite the uncertainty caused by the conflict, Saudi officials said that more pilgrims from abroad

participated in the Hajj this year than in 2025. The Saudi Ministry of Defence showed a video of advanced air defence batteries positioned on the outskirts of Mecca. "The air defence forces are responsible for protecting the skies above the holy sites and responding to all aerial threats, ensuring the

safety and tranquillity of visitors," the post read. Last week, Saudi Arabia's Ministry of Defence said that it intercepted three drones that entered its airspace from Iraq. The UAE said Tuesday that its air defence systems had detected six drones coming from Iraq over the previous 48 hours.

Pakistan: At least 24 killed, over 50 injured in targeted blast near Quetta Railway track

Quetta (Pakistan), 25/5: At least 24 people were killed, and over 50 were injured in a devastating explosion that struck near the Chaman Phatak railway area in Quetta, in Pakistan's restive southwestern province of Balochistan on Sunday. The attack, which authorities have described as a targeted operation, occurred as a train carrying military personnel and their families was passing through the city. According to officials, the explosion was caused by an explosive-laden vehicle that struck one of the train's carriages as it passed a signal at Chaman Phatak. The force of the blast caused several coaches to derail and overturn others, reported Geo News. The blast occurred shortly after 8 AM and derailed three coaches, including the locomotive, while two coaches overturned, reported Dawn, citing APP. Reports indicate the train, identified as the Peshawar-bound Jaffar Express, was transporting military personnel and their families travelling for the upcoming Eid holiday. Following the incident, an emergency was declared in government hospitals across Quetta, with doctors and

medical staff summoned to handle the situation. Railway authorities said the Peshawar-bound Jaffar Express was stopped at Quetta Railway Station after the blast as a precautionary measure, reported Geo News. According to the Pakistan Railways, the Federal Minister for Railways has condemned the Quetta blast. In an X post, the Pakistan Railways said that a shuttle train coming from Quetta Cantt was caught in a blast near Chaman Phatak. Rescue and relief operations are underway. "Federal Minister for Railways strongly condemns the

Quetta blast. The incident is cowardly terrorism. Such attacks cannot weaken national resolve. Shuttle train coming from Quetta Cantt caught in blast near Chaman Phatak. Rescue truck and relief train dispatched to the site for relief operations," he said Babar Yousafzai, the spokesperson to the home minister, said that all relevant institutions have been placed on high alert following an explosion in the city, reported Geo News. While the current death toll stands at 24, officials warn that the number may rise as search and

rescue operations continue. Over 50 people have been hospitalised, with several reported to be in critical condition. Balochistan Chief Minister Sarfraz Bugti condemned the horrific incident, saying that the "terrorists of Fitna Al-Hindustan" are proving their savagery by targeting innocent civilians, women, and children. Taking it to X, he stressed that those involved in the attack will not be spared, underlining that Balochistan will hunt down and eradicate the terrorists, their facilitators, and their masterminds. "I strongly condemn the terrorist incident near Chaman Phatak in Quetta. The terrorists of Fitna Al-Hindustan are proving their savagery by targeting innocent civilians, women, and children. Those who shed the blood of innocent people deserve no leniency. Let the enemy hear this: there will be no safe haven left for terrorists in Balochistan. We will hunt down the terrorists, their facilitators, and their masterminds one by one and bring them to justice, and this war will continue until the last terrorist is eliminated," he wrote.

Over 900 Suspected Cases Identified In Congo Ebola Response: WHO Chief

Geneva,25/5: World Health Organization (WHO) Director-General Tedros Adhanom Ghebreyesus said that as the Democratic Republic of the Congo (DRC) scales up surveillance in its Ebola response, more than 900 suspected cases have been identified so far, including 101 confirmed cases. In Ituri province, the epicentre of the outbreak, nearly 5 million people live amid ongoing conflict, with one in four in need of humanitarian assistance and one in five internally displaced, Tedros said in a post on X. "The violence is forcing people to flee, including health and humanitarian workers. This is severely impeding efforts to scale up Ebola contact tracing and identify infections early enough to provide supportive care," he added, noting that ongoing insecurity and fear are also fueling mistrust within communities. The WHO chief said that WHO and humanitarian health partners maintain a presence across Ituri, including in some of the hardest-to-reach and most insecure areas, where communities are facing not only the threat of Ebola but also a wide range of diseases. Tedros emphasised that delivering a comprehensive package of healthcare services is essential —

not only to meet urgent health needs, but also to build the trust that is critical for an effective Ebola response, Xinhua news agency reported. On May 16, Tedros determined that the Ebola disease caused by the Bundibugyo virus in the DRC and Uganda constitutes a public health emergency of international concern. On May 22, the WHO revised its risk assessment to "very high" at the national level, while keeping it as "high" at the regional level and "low" globally. According to the WHO, Ebola disease is a severe, often fatal illness affecting humans and other primates. The virus is transmitted to people from wild animals (such as fruit bats, porcupines and non-human primates) and then spreads in the human population through

direct contact with the blood, secretions, organs or other bodily fluids of infected people, and with surfaces and materials (e.g. bedding, clothing) contaminated with these fluids. The average Ebola disease case fatality rate is around 50%. Case fatality rates have varied from 25-90 per cent in past outbreaks. The first Ebola disease outbreaks occurred in remote villages in Central Africa, near tropical rainforests. The 2014-2016 Ebola virus disease outbreak in West Africa was the largest and most complex Ebola outbreak since the virus was first discovered in 1976. There were more cases and deaths in this outbreak than all others combined. It also spread between countries, starting in Guinea then moving across land borders to Sierra Leone and Liberia.

India-Canada Ties Back On Track, Says Envoy As Piyush Goyal Kicks Off Significant Visit

Washington, 25/5: India and Canada have moved from an "antagonistic" phase to an "extremely friendly" one, with security agencies, political leadership and businesses now working closely together, India's High Commissioner to Canada, Dinesh K. Patnaik, said in an exclusive interview to IANS. "The relationship really changed in the last few months from being antagonistic to being extremely friendly. Right now things are going well," Patnaik told IANS in an interview ahead of the visit of Union Commerce and Industry Minister Piyush Goyal, which he described as marking "the beginning of a new phase" in bilateral ties. Calling it the "biggest delegation ever", Patnaik said more than 100 Indian businessmen were expected to arrive alongside Goyal for meetings with Canadian industry groups, pension funds, banks, logistics companies and diaspora leaders. "The very fact that this meeting is taking place is the success of the story," he said. "Even one year back one wouldn't have imagined an Indian

minister coming with a hundred plus delegation to Canada." According to the High Commissioner, Goyal's visit is aimed at accelerating economic engagement and pushing forward negotiations on the proposed Comprehensive Economic Partnership Agreement (CEPA). "His main thing in coming in is to first of all say that we are now going to ramp up our economic and commercial relationship very high up," Patnaik said. He added that the minister's visit was also intended to "give a political push" to CEPA

negotiations and "signal that relationships are back to normal". Patnaik said bilateral trade currently stood at about 32 billion Canadian dollars, or nearly 25 billion US dollars, with both countries aiming to double it over the next five years. "We are hoping to reach about 50 billion US by 2030 or 2031," he said. The envoy said both governments had "put aside the problems of the past" and restored cooperation across sectors, particularly on security. "The national security advisors had come and gone. They have had discussions. The

agencies are talking to each other. The police forces are talking, the investigating agencies are talking," he said. He said both sides were now focused on ensuring "Canada is safe for India, and India is safe for Canada". Referring to extremist and criminal networks linked to pro-Khalistan elements, Patnaik said Canada had begun recognising the issue as its own domestic challenge. "What we have managed in the last six months or seven months to do, and thanks to the close assistance of the Canadian side, especially Prime Minister Carney, is to again put them on the fringe, marginalise them," he said. "They're (extremists) making money out of it. It became a thing, which is more of an economic activity than an ideological activity," he added, citing "gun running, drug smuggling, people trafficking, extortion" and organised crime. Patnaik identified energy, critical minerals, fertilisers, AgriFood, AI, quantum research and defence cooperation as major growth sectors. On immigration, he acknowledged that recent Canadian policy changes had

affected many Indians but insisted there was "no negativity about India". "They allowed the immigration system to be hijacked by people who could misuse it," he said. "They're trying to work out a system where they can get the benefit of good immigration without allowing the bad immigration to come in." "Indians need not worry," he added. "People here have a good opinion of them." India-Canada relations deteriorated sharply in 2023 after former Canadian Prime Minister Justin Trudeau alleged potential Indian involvement in the killing of Khalistani separatist Hardeep Singh Nijjar in British Columbia. India rejected the allegations as "absurd" and accused Canada of giving space to extremist and anti-India elements. In recent months, both countries have moved to stabilise ties through diplomatic engagement and renewed security dialogue. Trade, energy cooperation and people-to-people links remain central pillars of the relationship, with Canada hosting one of the world's largest Indian diaspora communities.

Petrol And Diesel Price Hike In India Smallest Among Fuel Importing Economies

New Delhi, 25/5: As the Middle East crisis continues to impact retail fuel prices, India had one of the smaller percentage increases, and sits on one of the lower absolute price levels among non-subsidising economies.

Through the 78 days from the closure of the Strait of Hormuz on February 28, to the oil marketing companies' (OMCs) revisions of May 15, 19, 23, and May 25, India held petrol and diesel prices essentially unchanged, while the rest of the world raised prices by 10, 20, 50, and, in some cases, 90 per cent. The cumulative Indian revision at just over Rs 7 a litre takes the headline movement on the retail price to roughly seven and a half per cent — equivalent to Rs 7.35 per litre on petrol and Rs 7.53 per litre on diesel — taking petrol prices in Delhi from Rs 94.77 to Rs 102.12 and diesel from Rs 87.67 to Rs 95.20. Every major developed economy now retails petrol above Rs 150 a litre and most above Rs 180; the EU 27 weighted average sits at Rs 179 on petrol and Rs 184 on diesel. India's two large neighbours — Pakistan and Nepal — have moved well past Rs 135 a litre on petrol despite lower nominal incomes. Sri Lanka, Myanmar, and the Philippines have crossed Rs 130 a litre. The only economies retailing petrol consistently below the Indian range are direct subsidisers (the UAE and Malaysia) or the US, which has structurally low fuel taxation. India, therefore, prices petrol and diesel at or below most of the developing world and at roughly half the European pump, while still raising less than any non-subsidising peer through the present disruption. Every other major importing economy has passed on the cost to its consumers and in several cases, doubling pump prices over 48 months. India has not. The Indian revision of just over Rs 7 a litre, equivalent to roughly seven and a half per cent off the Delhi base, is the smallest material upward movement of any major economy outside the directly subsidising Gulf producers — smaller than Japan, smaller than every European economy, smaller even than the South Asian peers that lack India's buffers.

Sensex Soars 1,073 Points On Hopes Of US-Iran Deal, Rupee Ends Stronger

Mumbai, 25/5: Indian equity benchmarks rallied sharply on Monday, tracking gains in global markets amid hopes of easing geopolitical tensions after US President Donald Trump said negotiations with Iran were progressing constructively. The Sensex surged 1,073.61 points, or 1.42 per cent, to close at 76,488.96, while the Nifty jumped 312.4 points, or 1.32 per cent, to settle at 24,031.7, reclaiming the crucial 24,000 mark. Commenting on Nifty technical outlook, experts said that 24,100 now acts as the immediate resistance level, followed by the 24,300-24,350 zone where significant Open Interest (OI) build-up is visible. "On the downside, the 23,950-24,000 band has now turned into an important immediate support zone after the successful breakout and sustained closing above this range," an analyst stated. "Sustained strength above this level could support further upside momentum, while failure to hold above the breakout range may lead to renewed consolidation in the near term," an analyst added. Among the top gainers on the Nifty index were Adani

Enterprises Limited, Eicher Motors Limited, Larsen & Toubro Limited and Bajaj Finance Limited. Market sentiment improved after Trump stated that talks between the United States and Iran were advancing in a positive direction. He also reportedly told negotiators not to rush into a deal, saying that time was on Washington's side. The comments raised hopes of a possible easing of hostilities in West Asia, supporting global risk appetite. The broader market indices also ended firmly in the green. The Nifty MidCap index rose 0.94 per cent, while the

Nifty SmallCap index gained 1.37 per cent during the session. Sectorally, banking stocks led the rally, with the Nifty PSU Bank, Nifty Private Bank and Nifty Bank indices outperforming the broader market. On the other hand, the Nifty IT, Nifty FMCG and Nifty Healthcare indices lagged behind, though they also ended with gains. Meanwhile, Rupee traded strongly positive near 95.22, gaining around 0.45 per cent, as improving sentiment around the US-Iran conflict supported risk assets and eased pressure on crude oil prices.

'India's Steel Sector Focuses On Sustainable Growth'

New Delhi, 25/5: India's steel sector is now entering a new phase where growth is no longer measured solely in volume, but also in sustainability, reflecting a deeper evolution in industrial priorities, according to an article in the Kuwaiti media. The country's proposed National Steel Policy 2025 targets an increase in crude steel capacity to 400 million tons by 2035-36, up from around 168 million tons currently, which firmly outlines the ambitious expansion plans ahead, the report in The Times Kuwait said. This reflects the rapid pace at which the infrastructure development, urban growth and manufacturing base are being strengthened, it added. Meeting these targets will require massive investments, estimated at approximately \$183.41 billion. Such capital inflows are expected to energise the entire value chain, from mining and transportation to processing and exports, driving widespread industrial momentum,

the article pointed out. It also highlighted that the steel industry already contributes about 2.5 per cent to GDP and supports nearly 2.8 million jobs. With expansion plans in motion, employment is projected to grow significantly, potentially creating over 3 million additional jobs by 2035-36 and reinforcing the sector's socio-economic importance. Parallel to this growth, a structured path toward reducing emissions is

being implemented. The policy aims to bring down emissions intensity to 2 metric tons of carbon dioxide per ton of finished steel by 2035-36, compared to the current level of around 2.65 tons, the article observes. It underscores that this transition is crucial, given that steel production accounts for roughly 10 to 12 per cent of the country's total carbon emissions. Reducing this footprint aligns

with India's broader commitment to achieving net-zero emissions by 2070. To meet these environmental goals, cleaner production methods are gaining traction. Gas-based steelmaking is being promoted as a viable alternative to coal-heavy processes, offering a pathway to significantly lower emissions. At the same time, the industry is increasingly embracing scrap-based production, signalling a shift towards circular economy principles. Recycling and reuse are becoming central strategies, helping to conserve raw materials while reducing environmental impact. Technology and infrastructure development will play a decisive role in this transition. Expanding gas pipeline networks, ensuring energy availability and strengthening industrial systems are essential to support cleaner and more efficient steel production across the country, the article added.

Indian Oil Firms Still Losing Rs 600 Crore A Day Due To High Crude Prices

New Delhi, 25/5: Government-owned oil marketing companies — Indian Oil, Hindustan Petroleum and Bharat Petroleum — are still losing around Rs 600 crore a day despite the increase in petrol and diesel prices announced on May 25, a senior government official said on Monday. This is the fourth increase in the prices of the two fuels over the last 10 days. The oil companies raised the price of petrol by Rs 2.61 a litre and that of diesel by Rs 2.71 per litre. The increase takes the cumulative rise in petrol and diesel prices to nearly Rs 7.50 a litre after daily revisions resumed following a prolonged freeze. "If you look at the global level, the price increase is in the range of 22 per cent for motor spirit (petrol) and 27 per cent for high-speed diesel (HSD)," Joint Secretary in the Ministry of Petroleum, Sujata Sharma, said. "But in India, the hike is

much less. For petrol, it is 7.7 per cent and 8.6 per cent for HSD. But before increasing the prices, the government undertook all the possible measures. The government has reduced excise duty on petrol and diesel by Rs 10 per litre, resulting in a revenue impact of Rs 14,000 crore," she said. Even after taking all these steps, the oil companies were piling up losses of Rs 1,000 crore a day. "After the price rise, it has reduced, but it is still slightly less than Rs 600 crore per day," she pointed out. Despite the latest hike in retail prices of auto fuels, the under-recoveries of oil marketing companies remain stubbornly high due to increasing losses in domestic LPG sales and high crude prices, ICRA Senior Vice President and co-group head, corporate ratings, Prashant Vasishth, said. The average price at which refiners import oil increased to \$107.84 in May

against \$69.01 in February before the war broke out, data compiled by the Ministry's Petroleum Planning and Analysis Cell showed. The benchmark Brent crude remained volatile in April, as the Iran war raged. It dropped to around \$90 a barrel on April 17 after a temporary ceasefire was announced, but hit \$126.41 a barrel on April 30 on fears of renewed hostilities. The monthly average works out to around \$117 a barrel. Retail petrol and diesel prices in India have remained largely unchanged since early April 2022, which reduced the profit margins of the public sector oil companies. Meeting domestic market requirements remains a priority for the government, and the oil companies will continue to source crude, which is technically and commercially fitting for their refineries, Sharma added.

Gold, Silver Rise Up To 2 Pc Amid Softer Dollar And Easing Crude Prices

Mumbai, 25/5: Gold and silver prices traded higher on Monday, rising up to nearly 2 per cent, supported by a weaker US dollar and softer crude oil prices as investors assessed prospects of progress in US-Iran peace negotiations. On the Multi Commodity Exchange (MCX), gold futures (June 5) were trading 0.36 per cent or Rs 566 higher at Rs 1,59,245 at 10:48 am. The yellow metal touched an intraday high of Rs 1,59,500, up 0.51 per cent or Rs 821 from the previous close of Rs 1,58,679. It recorded an intraday low of Rs 1,59,014, reflecting a gain of 0.21 per cent or Rs 335. Meanwhile, silver futures (July 3) traded higher, surging nearly 2 per cent or Rs 5,400 to hit an intraday high of Rs 2,77,245 so far. At the last count, the white metal was trading at Rs 2,76,427, up 1.7 per cent or Rs 4,581. It recorded an intraday low of Rs 2,75,428, still higher by 1.31 per cent or Rs 3,582. Silver and gold had earlier opened at Rs 2,76,683 and Rs 1,59,150, respectively, on the commodity exchange. According to commodity market experts, MCX gold continued to trade above the Rs 1,59,000 mark with a cautious-to-mildly

positive bias. "Immediate resistance is seen in the Rs 1,59,500-Rs 1,60,000 range, while a sustained breakout could push prices towards Rs 1,61,000. On the downside, support is placed around the Rs 1,58,000-Rs 1,57,500 levels," they said. They further said that MCX silver was also holding firm above the Rs 2,76,000 mark amid ongoing volatility, adding

that a sustained move above Rs 2,77,000 may support further recovery towards the Rs 2,79,000-Rs 2,80,000 zone, while support is seen near Rs 2,73,000. "Safe-haven demand and geopolitical developments continue to influence the direction of precious metals," the experts noted. In the international market too, precious metals traded higher,

with COMEX gold rising 0.75 per cent to \$4,557.30 per ounce. COMEX silver was trading over 2 per cent higher at \$78.015. In addition, global crude oil prices declined sharply, with international benchmark Brent crude falling 6 per cent to \$97.16 a barrel, while US West Texas Intermediate (WTI) crude tanked more than 6 per cent to \$90.33.

"She is not here to please you": Kangana Ranaut shuts down critics of Aishwarya Rai Bachchan's Cannes looks

Actor Kangana Ranaut has come out to show support for Aishwarya Rai Bachchan, who recently turned heads at the Cannes Film Festival 2026. In a strong-worded Instagram story, Kangana showed great admiration for Aishwarya. Calling out the critics, the 'Queen' star wrote, "Fashion and style is a self-expression, it is one's own interpretation of life and their attitude, no woman owes anything to anyone, Ash looks great!! Those of you who want to see her any other way, why don't you show what you got?? She is not here to please you, she is glorious, if you are not used to seeing older women on red carpets, get used to them now. Thanks." Along with her message, Kangana also shared a picture from Aishwarya Rai's Day 1 look, when she opted for Amit Aggarwal's custom sculptural gown. Aishwarya Rai made her much-awaited return to Cannes with a stunning appearance on the red carpet. For the first day, she chose a gorgeous Amit Aggarwal ensemble. For this year's appearance, Amit Aggarwal designed Luminara, a couture creation centred around the idea of light in motion. Structured wing-like extensions emerging from the shoulders evoke movement and propulsion, while contouring the body with architectural sharpness. Rendered in an abyss blue, the couture piece references cosmic depth and the infinite nature of light travelling through space. For L'Oréal Paris' annual "Lights On Women's Worth" gala, Aishwarya chose a romantic blush pink ensemble by Sophie Couture. Appearing on the French Riviera, the Cannes veteran embraced soft glamour in a custom baby pink gown featuring a heart-shaped fitted silk silhouette paired with a flowing chiffon cape and embellished floral detailing.

Ram Charan apologises after calling Jasprit Bumrah a footballer

Ram Charan has apologised to Indian cricketer Jasprit Bumrah after mistakenly referring to him as a footballer during an event of 'Peddi' in Bhopal. The actor's back-to-back slip-ups at the event have quickly gone viral on social media, triggering widespread reactions online. The Bhopal event for the upcoming film was held on Saturday and featured AR Rahman, Janhvi Kapoor and the rest of the film's cast and crew. During an interactive session, Ram Charan was asked to describe some of India's leading cricket stars in a few words. The actor reportedly described Sachin Tendulkar's journey as a "long, legendary run", called MS Dhoni "calm and cool", referred to Rohit Sharma as "everybody's man", and used the word "Fire" for Virat Kohli. However, when asked about Jasprit Bumrah, Ram Charan said, "Jasprit Bumrah ji, I am your biggest fan. I love football ap football ko itne aage bada rahe ho. Love you," as per online videos on X. Clips of the moment have spread rapidly across social media platforms, with users reacting through memes and jokes. The actor later acknowledged the error and posted an apology on X. Taking to the platform, Ram Charan wrote, "Uff... I'm genuinely so forgetful with names sometimes. Apologies to @Jaspritbumrah93 Ji for the mix-up - it was a genuine human error in the middle of all the excitement and the crowd." He added, "I truly respect you and I am a huge fan of your game. You make every Indian feel proud when you consistently put batsmen on back foot." Meanwhile, the trailer of 'Peddi' has recently been released, showcasing Ram Charan in multiple sporting avatars including cricket, wrestling and sprinting. Directed by Buchi Babu Sana, the Telugu film also stars Janhvi Kapoor, Boman Irani and Divyendu Sharma in key roles. Produced by Vriddhi Cinemas under producer Venkata Satish Kiluru, the film's music has been composed by AR Rahman.

Dev Kumar Meena And Kuldeep Kumar Set New Benchmark In Men's Pole Vault

Ranchi, 25/5: Madhya Pradesh's talented athletes—Dev Kumar Meena and Kuldeep Kumar raised the bar to 5.45m to set national record in the men's pole vault on the penultimate day of the 29th National Senior Athletics Federation Competition here in Ranchi. Both the athletes bettered the previous national men's pole vault record of 5.41m, but Dev Kumar Meena walked away with the gold medal while Kuldeep Kumar settled for silver (on countdown). The previous record of 5.41m was set recently by Kuldeep Kumar in Bhubaneswar. The gold and silver medalists have also achieved the Commonwealth Games qualification mark of 5.25m. The meet record was 5.35m set last year by Dev Kumar Meena. Training partners and close friends, Dev Kumar Meena and Kuldeep Kumar next goal is to repeat their performance at the international level. "It was a good day for us and we will continue to push each other to further raise the bar in future," jubilant Dev Kumar Meena said after winning the gold on Sunday. If the

spotlight was on sprinters on Saturday, the main attraction on Sunday was field events. At the long jump pit, Murali Sreeshankar won the gold medal with a jump of 8.08m which was better than the CWG qualification mark of 8.05m. Sarvesh Anil Kushare of Maharashtra dominated the men's high jump. His gold-medal winning performance of 2.28m was better than CWG mark of

2.22m. Kushare also equalled the meet record set by Tejaswin Shankar. He also raised the bar to 2.30m to improve the national record of 2.29m but missed all three attempts. Aadarsh Ram, winner of silver medal, also achieved the qualification mark of CWG (2.22m). The men's 110m hurdles was dominated by Tejas Ashok Shirse representing Reliance. His gold-winning

time was 13.50 seconds. He improved his own meet record of 13.61 secs but missed out to win a CWG berth. The qualification time was 13.39 secs. Earlier in the morning session, Ravina representing Haryana won the gold medal in the women's 10,000m race walk with a time of 44:29.66 seconds which was better than the Commonwealth Games qualification time of 44:44.58 seconds.

It Wasn't My Decision': Yash Dayal Breaks Silence on IPL 2026 Absence Amid POCSO Case Storm

NEW DELHI, 25/5: Yash Dayal has finally addressed his absence from IPL 2026, saying the decision to stay away from the tournament was "not a personal decision." The Royal Challengers Bengaluru pacer made the remarks while speaking on a YouTube show amid ongoing legal controversies surrounding him. Dayal's comments have sparked fresh discussion after RCB earlier stated that he was unavailable due to a "personal situation." Speaking candidly about the situation, Dayal said he misses being part of the IPL and watching his teammates from home has been emotionally

difficult. "Opting out of this season wasn't my personal decision," Dayal said. "The decision is always made by the authority. I don't know what the reason behind RCB's decision was." The statement appears to contradict the earlier explanation offered by RCB's director of cricket Mo Bobat, who had suggested the break was taken in the best interests of both the player and the franchise. Despite missing the season, Dayal claimed his relationship with the franchise remains intact. He pointed out that RCB retained him and did not sign a replacement, which he believes

reflects the management's trust in him. "I have been in conversations with the management, coach and Dinesh Karthik. The connection hasn't broken," he said. Dayal added that there is "no communication gap" between him and the franchise. According to reports, a case involving allegations of sexual exploitation under the pretext of marriage was registered in Ghaziabad. He reportedly received protection from arrest from the Allahabad High Court in that matter. In another case registered in Jaipur, involving allegations linked to a minor under the

POCSO Act, the Rajasthan High Court reportedly declined to grant him relief from arrest, citing the seriousness of the allegations. The accusations are under legal scrutiny, and investigations remain ongoing. Reports claim the complaint filed in Jaipur alleged that the minor came in contact with Dayal during an IPL match and was subjected to repeated abuse over two years. The complaint also reportedly accused the cricketer of emotional manipulation and making false assurances related to a cricket career. Dayal has not publicly responded in detail to the specific allegations.

Dharmendra to Receive Posthumous Padma Vibhushan, Hema Malini Calls It an 'Emotional Moment'

Veteran Bollywood icon Dharmendra will be honoured with the prestigious Padma Vibhushan posthumously, months after his passing in November 2025. Actor and wife Hema Malini is currently in New Delhi to receive India's second-highest civilian award on his behalf during the Padma Awards 2026 ceremony hosted by President Droupadi Murmu. The legendary actor, fondly known as the "He-Man" of Hindi cinema, was announced as a Padma Vibhushan awardee earlier this year for his immense contribution to Indian cinema spanning several decades. Speaking from Delhi ahead of the ceremony, Hema Malini described the occasion as deeply emotional for the family. "It's an emotional moment for me. Ahana is with me, Esha wanted to come but could not make it here. The entire family is happy. Sunny, Bobby, everyone is aware of this and it's a big moment for all of us," she shared. Dharmendra passed away

in November 2025 at the age of 89, just weeks before his 90th birthday. His death marked the end of a remarkable era in Indian cinema, leaving fans and film personalities across the country heartbroken. Following his demise, Prime Minister Narendra Modi paid tribute to the legendary actor, calling him an "iconic film personality" admired for his versatility, humility and warmth. Dharmendra delivered several unforgettable performances throughout his career and became one of the most

loved stars in Bollywood history. From action-packed blockbusters to emotional family dramas and romantic classics, his work shaped generations of Indian cinema lovers. His legacy also continues through his family, including actors Sunny Deol, Bobby Deol, Esha Deol and Ahana Deol. The Padma Awards 2026 ceremony has already generated massive attention online, with fans celebrating Dharmendra's enduring influence on Indian films and popular culture.

"It is great honour": Padma Shri awardees Dharmiklal Chunilal Pandya, Sunita Godbole, Tripti Mukherjee express gratitude ahead of Rashtrapati Bhavan ceremony

New Delhi: Ahead of the Padma Awards ceremony scheduled to be held at Rashtrapati Bhavan in the national capital on Monday, several Padma Shri awardees expressed gratitude and pride and disbelief at being recognised with one of the country's highest civilian honours. On being conferred with the Padma Shri 2026 in the field of arts, Dharmiklal Chunilal Pandya told ANI, "I am very happy to receive the Padma Shri award. The Government of India has appreciated the hard work I have done over so many years. I have no words to express my gratitude. I began working at the age of 25 and, even today, at 94, I continue to work." Kantha embroidery artist Tripti Mukherjee also expressed much

delight and added, "... I am delighted to have been honoured with the Padma Shri. This award has brought joy not only to me but also to those around me." Ethnomusicologist Dr Lars-Christian Koch, who is also set to receive the honorary Padma Shri in the field of arts, said, "It is a great honour to receive this award. I have deep love for India. I lived in India for a long time, and I never expected such recognition, so it came as a wonderful surprise. My connection with India began through learning Indian music and engaging in social work in Germany to promote Indian culture. My teacher from West Bengal, introduced me to Indian culture, particularly Bengali traditions, and this profoundly

changed my life and personality." On the other hand, Dr Sunita Godbole, who will be conferred with Padma Shri 2026 in the field of medicine, spoke to ANI and described it as "deeply satisfied." "The award has been given in the field of medicine. Other than health work I have also been involved in women's organisations. I am not just a doctor but a social worker. The work we have done will now be recognised more widely. Dantewada, once infamous for Naxalism, will now be known for healthcare, education, employment, environmental protection, forest development, and forest-based livelihoods.
